## Irish Geoscience Graduate Programme

## What is the Irish Geoscience Graduate Programme?

The Irish Geoscience Graduate Programme involves the heads of geoscience schools and departments at six universities and one research institute who are actively involved in training postgraduate students in the geosciences.

It is designed to form part of structured PhD programmes, with a visionary and unique objective, to establish a robust, holistic broad based training programme for postgraduate students for their fourth level degrees (primarily PhD) on the island of Ireland.

**Our modules are also available to working professional geoscientists.**

All courses are available free of charge to any students registered at an Irish or Northern Irish Third or Fourth Level Academic Institution. **The courses are also available to non-Irish students or to industry as Professional Development for a small fee.**

For information and course modules, please visit the IGGP website: [www.iggp.ie](http://www.iggp.ie) or email Caroline Moloney, Senior Administrator [moloneca@cp.dias](mailto:moloneca@cp.dias)

Funding continues to be provided by the Geological Survey of Ireland through an NDP- supported Griffith Award to Prof. Alan G. Jones at the Dublin Institute for Advanced Studies (DIAS).
